

LiveFrame

'LIVEFRAME – DIGITAL PHOTO FRAME' NOW SUPPORTS APPLE AIRPLAY

Bring your photos to life! Turn your big screen into a life-size photo frame.

OTTAWA – May 7, 2015 – Mobile development company *Attibo* makes it even easier to turn your Apple device into a dynamic digital photo frame with their newest update. Do you, your friends, and family use a variety of social media and photo sharing sites to post photos? *LiveFrame – Digital Photo Frame* is the easiest way to collect and curate those photos, allowing you to sit back and enjoy as the updates and memories come to you.

LiveFrame lets you access photos that you and your contacts share on the most popular social media sites, as well as adding photos and albums from your own devices. You can stay current by viewing photos uploaded in the last day, week, or month, review all the photos from the last year at the touch of a button (perfect for a birthday or New Years' party!), or curate your frame by selecting specific users and albums. Now you can even turn your big screen into the largest digital photo frame on the market. (Version 1.3 available May 7, 2015).

“We couldn’t find a digital frame on the market that would easily and affordably allow us to view photos from multiple sources – so we made it ourselves! We started using LiveFrame to view recent family photos, but quickly realized that it also brings new life to old memories and new purpose to our underused and charging devices.”

LiveFrame is free to download at: <http://goo.gl/6s4QB8>. Minimum. iOS 6.1 or higher recommended. Ads can be removed via IAP for \$1.99USD. Additional photo sources and transition options coming soon!

Visit <http://www.liveframeapp.com/liveframe/press/> for more information and screenshots.
